

Help Mary Njoki get the critical care she needs.

Mary was seriously injured in a hit-and-run accident. She remains in ICU, managing high blood pressure, high blood sugars and dialysis while awaiting surgery. Her hospital bill has reached **KSh 2,000,000**. So far the family has raised **KSh 500,000**, but we still need **KSh 1,500,000** to clear the bill. New complications and other contingencies can arise at any time.

What happened to Mary

Mary is an elderly woman who was struck by a hit-and-run driver. Alongside her accident injuries, she is now managing high blood pressure, high blood sugars and dialysis while awaiting surgery. Your support helps keep her treatment going.

INJURY

Multiple hip fractures

Both hips were fractured, requiring specialised orthopaedic care.

INJURY

Left hand broken

A broken left hand limits her ability to do daily tasks.

FINDING

Vascular changes

Mild atherosclerotic calcification in both internal carotid arteries.

STATUS

Still in ICU

Advanced age and trauma keep Mary in intensive care.

CONDITION

High blood pressure

Elevated blood pressure requiring close monitoring.

CONDITION

High blood sugars

High blood sugar levels add another layer of care.

STATUS

Surgery pending

Surgery is on hold while doctors stabilise her condition.

TREATMENT

Dialysis procedures

Dialysis supports her kidneys before further procedures.

Current medical situation

Mary's scan showed preserved grey matter in her cerebral hemispheres, with mild atherosclerotic calcification in both internal carotid arteries, and post-traumatic bowel wall oedema. She is also managing high blood pressure and high blood sugars, and is undergoing dialysis while a planned surgery awaits. These combined factors make her recovery complex and require continued close monitoring in ICU.
